Fearfully & Wonderfully Made

The growth rate of nails is related to the length of the terminal phalanges (outermost finger bones). Thus, in humans, the nail of the index finger grows faster than that of the little finger; and fingernails grow up to four times faster than toenails.

In humans, nails grow at an average rate of 3 mm (0.12 in) a month. Fingernails require three to six months to regrow completely, and toenails require twelve to eighteen months.

Daniel 4:33

Immediately the word concerning Nebuchadnezzar was fulfilled; and he was driven away from mankind and began eating grass like cattle, and his body was drenched with the dew of heaven until his hair had grown like eagles' feathers and his nails like birds' claws.

Fearfully & Wonderfully Made is sponsored by the Health Ministries Dept.

*Please note the service is recorded and streamed live during the Divine Service programme.
