Fearfully & Wonderfully Made

Hip joints are ball and socket joints giving them a wide range of movement. Surrounded by muscles and ligaments they require a great deal of force to become dislocated such as a motor vehicle collision or fall from height. A hip dislocation is a disruption of the joint between the femur and pelvis. Symptoms typically include severe pain and an inability to move the hip.

Genesis 32:24-26, 32

24 Then Jacob was left alone; and a Man wrestled with him until the breaking of day. 25 Now when He saw that He did not prevail against him, He touched the socket of his hip; and the socket of Jacob's hip was out of joint as He wrestled with him. 26 And He said, "Let Me go, for the day breaks." But he said, "I will not let You go unless You bless me!"

32 Therefore to this day the children of Israel do not eat the muscle that shrank, which is on the hip socket, because He [] touched the socket of Jacob's hip in the muscle that shrank.

*Please note the service is recorded and streamed live during the Divine Service programme.
